Agriculture and Food Saskatchewan

1999 Saskatchewan Crop District Crop Production

Crop District Map | Saskatchewan | Canada | Winter Wheat | Spring Wheat | Durum | Oats | Barley | Fall Rye | Spring Rye | Flaxseed | Canola | Mustard | Sunflower seed | Field Peas | Lentils | Canary seed | Summerfallow |

Saskatchewan production of the major grains, oilseeds and specialty crops in 1999 was 28.21 million tonnes, 18% above the ten-year (1989-98) average of 23.99 million tonnes. Above average seeded and harvested area of total crops and average to above average yields combined to produce the above average crop production in 1999.

Seeded area in 1999 was estimated at 33.16 million acres, 3% above the ten-year (1989-98) average of 32.21 million acres. Harvested area was estimated at 32.18 million acres, 3% above the ten-year (1989-98) average of 31.15 million acres.

Above average harvested area and yields resulted in record production of:

- flaxseed 0.7 million tonnes
- canola 4.0 million tonnes
- sunflower seed 35.4 thousand tonnes
- lentils 0.7 million tonnes
- dry peas 1.6 million tonnes
- triticale 41.9 thousand tonnes
- chickpeas 0.2 million tonnes

Above average production was reported for:

- winter wheat 95.3 thousand tonnes
- durum 3.4 million tonnes
- oats 1.5 million tonnes
- barley 4.9 million tonnes
- mustard 0.3 million tonnes
- canary seed 0.2 million tonnes
- safflower 1.8 thousand tonnes

Below average production was recorded for:

- spring wheat 10.3 million tonnes
- fall rye 0.2 million tonnes
- spring rye 8.4 thousand tonnes
- mixed grains 10.2 thousand tonnes

Tame hay production in Saskatchewan was estimated at 4.13 million tonnes in 1999, 44% above the ten-year (1989-98) average of 2.87 million tonnes. Saskatchewan summerfallow acreage was estimated as 10.50 million acres in 1999, 16% below the ten-year (1989-98) average of 12.47 million acres.
